W32 Sober Worm And Its Variants Removal With Registration Code

What's New in the?

CleanSober.EXE is an advanced tool to detect and remove the W32/Sober worm and its variants completely from your computer. Sober is a worm that spreads rapidly, a serious threat to Windows users, making it very difficult to remove without a complete clean. Sober is a worm which spreads through e-mails. It spreads through all MS-Outlook 2003/2000 instant messenger and chat applications. Sober first appears as a document named "Buyer.doc". The worm changes the email address of all the contacts in the victim's address book to some other address, which is used by the worm to spread. Sober then modifies some of the windows registry files, which may cause some critical system errors. The worm then starts to spread through all the e-mails that are stored in the victim's Inbox folder. Sober spreads through any e-mail from "Buyer.doc" documents and any attachment to the e-mail messages. Features of CleanSober.EXE: A: Security scanner and W32/Sober Worm remover. B: Detection and removal of the W32/Sober Worm and its variants. C: Scan for possible problems with the Windows registry. D: E-mail support via POP3. E: Friendly user interface. F: All functions in one package. G: Toolbar and tool windows for direct access. H: Real-time protection against Spam and W32/Sober Worms. I: More than 300 MB of memory required to run CleanSober. J: Can be used as service. K: Create executable files. Download CleanSober.EXE PRODUCT DESCRIPTION CleanSober.EXE is an advanced tool to detect and remove the W32/Sober worm and its variants completely from your computer. Sober is a worm that spreads rapidly, a serious threat to Windows users, making it very difficult to remove without a complete clean. Sober is a worm which spreads through e-mails. It spreads through all MS-Outlook 2003/2000 instant messenger and chat applications. Sober first appears as a document named "Buyer.doc". The worm changes the email address of all the contacts in the victim's address book to some other address, which is used by the worm to spread.
